- Number of Issues Resolved - 0
- Number of SMDR Issues - 1
- Non-SMDR Issues - 1

# SMDR Issues

- Course: Petroleum Supply Specialist (77F10)
- Issue: The POI does not meet The Army's training needs.
- Discussion: Less than 10% of the force requires this additional equipment training. This is a POI issue not an equipment issue.
- Position (Single RC):
  - Revise POI to omit pipeline tasks for basic MOS and make it a unit task or ASI.
  - Set up additional POL training sites if pipeline tasks must be trained.
  - Design and implement simulation training.
  - Conduct as part of post mobilization training.

# Summary

- Number of Issues Presented - 21
- Number of Issues Resolved - 20
- Number of SMDR Issues - 1
- Non -SMDR Issues - 0

# SMDR Issues

- Course: Quarry Specialist (62G10)
- Issue: ARNG and USAR only.
- Discussion: Problem with availability of qualified instructors at school.
- Position (Single RC):
  - Merge training into another MOS or make an ASI.
  - Use contract instructors.
  - Train soldiers in another MOS, and then reclass.
  - DAMO-FD look at force structure requirements.

- Number of SMDR Issues - 1
- Non-SMDR Issues - 0

# SMDR Issues

- Course 031-54B10-40
- **Issue:** With the implementation of ADRS, the current allocation of CDTF training days will adversely affect the RCs ability to achieve MOSQ in the out years.
- **Discussion:**
  - CDTF ability to meet training requirement is not an issue, but distribution of days for the RC is an issue.
  - Estimated cost is \$1M to add one training day to accommodate RC soldiers on the weekend.
  - USARC/ARNG does not want a different standard for the RC soldiers, but they are challenging the validity of CDTF training for BNCOC/ANCOC.
  - There is a 24 hour incubation period after a soldier has been exposed to a live agent in the CDTF.
  - The USAR and ARNG are allocated 2 days per Annual Training (AT) period and an additional day, when requested. The number of CM operations specialists has increased each training year creating an enormous demand to train these soldiers. Presently the Total Army School System (TASS) Chemical Battalion's have been able to meet these demands for training its soldiers.
- **Position (Single RC):**
  - Make the CDTF available during IDT. Redistribute training days across the training year to allow units to schedule training during IDT.

# Aviation School

## NTCC Issues

# Summary

- Number of Issues Presented - 8
- Number of Issues Resolved - 6
- Number of SMDR Issues - 2
- Non-SMDR Issues - 6

# SMDR Issue

- Course - 552-CAM BNCOC (67), Phase 3
- Issue - Cost Efficiencies (Equipment and Instructor)
- Discussion - If DCST approves the training to occur at USAALS (SC552)
- Resolution - NGB-AVS will provide draft requirements NLT 3 AUG 01

# SMDR Issues

- Course - 93C, ATC Operator
- Issue - TATS Course Validation
- Discussion - Course is currently loaded in ATRRS; Aviation Proponency requires 3 iterations be conducted to validate course
- Resolution - Course should be flagged and taken off of ATRRS until the pilot is validated

# General Issues

- CCR MOU for TASS - Review responsibilities. Updated guidance requested on procedures and relationships
- Recommend DAMO and DCSED provide a representative/observer for AATS accreditation
- Written guidance on procedure for staffing CAD prior to ATRRS entry

**NTCC  
2001**

# SMDR Issues

- **Course:** B/ANCOC Ph-1 (Common Core)
- **Issue:** AC Requirements
- **Discussion:** AC requirements must be loaded into TACITs on the RC schedule (ie: prior to RTCC). After the fact eliminates all workload done by regions..
- **Recommendation:** PERSCOM must load in requirements on the same schedule as RC QSM
- **ESS Recommendation:** PERSCOM will post numbers for for A/BNCOCC. There will only be a single year lapse as following years will be added via TACITs based on this initial input.
